

We Keep Mount Pulaski “ON THE GO!”

HOW important today's automobiles and trucks are! We depend upon them for short trips around town, for longer journeys, and for vacation trips clear across the country. Many Mount Pulaskians earn at least a part of their living by driving.

LIKE any piece of fine machinery, today's autos deserve the care of trained mechanics. In our garage we specialize in keeping Mount Pulaski's autos in top condition, ready to obey the commands of their owners. We have the equipment and know-how to handle everything from a lubrication or a tune-up to a major overhaul or other big repair job.

WE enjoy our job, and like to feel we are making a contribution to the community by Keeping Mount Pulaski On The Go!

125 YEARS AGO...

HAD we been in the business of Keeping Mount Pulaski On The Go back in the pioneer days when our city was founded, our business would have been blacksmithing, rather than mechanics, for the automobile was yet to be perfected and the horse was the usual mode of transportation.

IN ITS 125-YEAR HISTORY, our City has made great strides, and we feel truly proud to be a part of it!
