To provide for a physical educational program, a gymnas-ium 74x48, the size recommended by state authorities for grade school purposes will be constructed and will have a seating capacity of approximately 500.

Each taxpayer will observe that they are being called uponto select a site for the building. The necessity of placing this question on the ballot is brought about by technical legal consideration. Briefly, the present school building and site were acquired by the present Board through a consolidation but never has it been acquired by the Board by a direct vote upon the site. The Board especially wishes the public to know that it is their desire that the public vote upon the site now occupied and used by the grade school as they have no desire whatsoever to acquire a new site.
